Templated CDA business case

- **Streamlined standards development**
 - Reusable building blocks.
- **Streamlined standards implementation**
 - Implement once, deploy often.
- **Modular and reusable**
 - Templates (e.g., blood pressure, discharge diagnosis) can be repackaged with other templates in any number of CDA implementation guides.
- **Core component of CDA's “incremental interoperability” strategy**
 - Begin with simple CDA, and add templates as they are prioritized.

Templates are computable artifacts

Standards Development

- ~ 42 templates per guide: 24 new, 18 reused.
